DETAILED ACTION

1. Applicant's Application filed on October 14, 2003 and Preliminary Amendment filed on June 01, 2004 have been reviewed. Claims 1, 5, 6 have been amended, claims 2-4 and 7-18 have been canceled, and claims 19-35 have been added.

2. Claims 1, 5, 6, and 19-35 are presented for examination.

Allowable Subject Matter

3. Claims 1, 5, 6, and 19-35 are allowed over the prior art of record.

The prior art of record fails to teach or suggest individually or in combination **dividing the query into a plurality of query parts corresponding at least one database and at least one condition statement and determining whether the query including unprocessed parts and if the query having unprocessed parts, sending at least one unprocessed part to the translation** as set forth in independent claims 1 and 26.

Dependent claims 5, 6, 19-25, and 27-35 being further limiting to the independent claims 1 and 26 respectively, definite and enable by the Specification are also allowed.

The closest prior art, Sorace et al. US Patent No. 6,606,622 teaches a system that relies on a library of data entry forms inclusive of separate forms for prompting a user to enter data characterizing the effects of a test agent applied to a test cell population's experimental group as compared to its control group with other agents being identical between the experimental group

and control group. The closest prior art fails to anticipate or render Applicant's limitations above obvious.
